

Paper Evaluation and Summary

Name: _____

Paper (short title) _____

- What is the main finding of this paper and why is it important?
- Describe at a high level the basic technique used. Try a series of “steps” here if necessary, if there is a sequence to be followed (like a recipe)
- Choose an interesting technical aspect of the experiment and describe its relation and importance to the measurement
- Pick one systematic uncertainty issue that you find interesting and describe its importance and the author’s method of addressing it.
- Where did you get lost? Was there anything you did not understand?
